# The Original Dust Deputy® Dust Deputy

U.S. Patent # 7,282,074  
U.S. Patent # D688409

## Dust Deputy® Cyclone Retrofit

### Plastic Static Conductive Dust Deputy®

Part #	Description	Introductory Price
AXD000009	2" Tapered Inlet Plastic Static Conductive Dust Deputy® Includes: 9 Gal. Static Dissipating Plastic Dust Bin / 61" Hose / Connecting Elbow / Hardware / Dust Bagger	\$249.00

**Stage 1** - The debris passes through the Oneida Air Systems Dust Deputy® where the cyclonic action separates out 99%+ of the dust and deposits it into the 9 gallon collection box before it goes to Stage 2.

**Stage 2** - The fractional percentage of dust that makes it through the Dust Deputy® is then deposited into the Festool collection bag.

**Stage 3** - The few particles of dust that escape the bag then pass through the Festool's HEPA filter where 99.97% of particles .3 microns and larger are trapped, leaving the escaping air ultra-clean.

*Big 9 gallon capacity dust box tackles planers, moulders and routers.*

*Easily latches to Festool CT shop vacuum with no additional hardware.*
