

**You deserve the ultimate protection for your wood floors.**

**Why Waterbased Finish?**

**Durable protection:** Safeguard your wood flooring investment with long-lasting durability.

**Choices:** Different products for ambered or clear appearance. Multiple sheens for a variety of gloss levels.

**Green:** Low VOC finish means less harmful fumes.

**Fast Dry Times:** Get back on your floor in no time.

**Wear Resistance**

**StreetShoe® 275 is the leader in wood floor finish durability.**

Finishes were tested in accordance with ASTM Designation: D 4060-01

# Why Basic® Coatings?

Born out of bowling alley finishes in the 70's, Basic® Coatings was waterbased before waterbased was green. Manufactured right here in the USA, Basic Coatings was the originator and remains the innovator in waterbased wood floor finish.

## Lifetime Maintenance Instructions for Your Wood Floor

### Weekly

**Microfiber Mop with Squeaky™ Cleaner**

The key to extending the life of your floor is maintaining your floor. Basic Coatings Squeaky Cleaner and Microfiber Mop were specifically designed to clean wood floors and not leave a residue.

**If the floor has a build up of dirt or contaminants**

**Intensive Cleaning**

Contact your wood flooring contractor to remove tough dirt and surface contaminants with the Dirt Dragon™ cleaning machine.

**When the floor shows wear**

**Recoat**

Recoating does not have to be a dusty mess. With the TyKote® Dust-Free Refinishing System, recoating can be done in one day.

**NO DUST!**

## Protection

- ◆ Use mats in traffic areas and doorways. Avoid rubber-backed mats as they may discolor the floor.
- ◆ Place felt pads under furniture.

## Helpful Tips

- ◆ Do not use wax or silicone-based polishes or cleaners. Some wood flooring cleaners sold at your local store may actually make the floor more difficult to clean and may create problems when the floor requires refinishing.
- ◆ Use a humidifier/dehumidifier to maintain a consistent humidity level. Wood flooring will naturally expand and contract with changes in temperature and humidity.
- ◆ Avoid deep scratches. High heels and dog nails can damage wood flooring. Do not slide furniture across the floor.
