

Bona® Multidisc

Technical data sheet

Innovative - 6 Disc drive plate creates the perfect surface for a Bona finish system. The six, 5" discs spin independently of each other, all but eliminating swirls and scratch marks, leaving the floor smooth and flat.

- Perfect for patterned and dark stained floors
- Great for removing chatter marks
- Uses 5" Velcro backed abrasives
- Comes standard with six 1/4" Interface Pads for detailed, specie specific sanding on uneven surfaces
- Sanding Options
 - Use without interface pad for all species with flat surfaces
 - Use 1/4" pad for uneven surfaces or softer, more open grain species
 - Use 1/2" pad for uneven surfaces on tighter, harder species (sold separately)

Bona® 5" Abrasive Disc

Bona has developed a line of 5", 8 hole abrasive discs. These discs are not only designed for the Bona Multidisc drive plate but also work on most 5" random orbit sanders

- Silicone carbide grit won't leave harsh scratch patterns in the floor
- Uses same backing as edger disc for longer life and stability over standard 5" random orbit paper
- Siafast backing for easy chowie out
- Available in grits 36, 40, 60, 80, 100, 120
- 8 hold pattern is compatible with most random orbit sanders
- Bona Multidisc Interface Pads can be used to drive the 5" disc on floors where some contouring is needed

Accessories

Bona Interface Pads

These innovative pads, available in 1/4" and 1/2" size, allow for specie specific sanding where surfaces may be uneven. The 1/4" pad gives a perfect, clean look on more open grain, and softer species like red and white oaks, pine, fir, etc. The 1/2" pad makes sanding harder, tighter grained species easier like Brazilian cherry, IPE, Tigerwood, etc, leaving the cleanest, smoothest surface.

- Use 1/4" pad, where contouring is needed, on softer, more open grain species
- Use 1/2" pad, where contouring is needed, on harder, tighter grained species
