

# Bona Prep®

Conditions and prepares existing wood floor finish to optimize adhesion of a new coat of finish

Bona Prep® is a specially formulated recoat adhesion system for all types of polyurethane finished hardwood floors, including factory prefinished floors. Bona Prep conditions and prepares the existing finish to optimize adhesion of the new coat of finish.

- Removes scuffs and surface scratches, rather than just covering them
- Convenient – pre-mixed and ready to use
- Easy – does not require special training or certification
- Fast – Just spray and buff

# Bona Prep®

Conditions and prepares existing wood floor finish to optimize adhesion of a new coat of finish

## PHYSICAL CHARACTERISTICS

**Ingredients** – Surfactants, Dipropylene Glycol Monomethyl Ether, Ethylene Glycol Monobutyl Ether, water, other proprietary ingredients

**Color** – Amber (wet)

**pH** – 7.0 – 8.0

**Solids** – <1%

**Density** – 8.32 lbs/gallon (1.0 S.G.)

**VOC** – <2%

**Odor** – Light antiseptic

**Stability** – 1-year shelf life

**Packaging** – 32 oz. plastic spray bottle and 1-gallon jug

## APPLICATION CHARACTERISTICS

**Clarity** – Negligible residue (dry)

**Drying Time** – 15 - 20 minutes

**Application Tools** – Bona® Conditioning Pad and buffer

**Coverage** – 2,000 sq. ft./gal. (approx.).

## RECOMMENDED USE

For all polyurethane-finished hardwood floors. Aluminum oxide, ceramic, and other factory prefinished floors.

**BEFORE USING, READ ALL DIRECTIONS AND MATERIAL SAFETY DATA SHEET.**

FOR TECHNICAL ADVICE: Call Bona US at 800-872-5515

## COMPATIBILITY

Do not use this product on any floor that has been waxed, polished, oiled or has been maintained with a commercial maintenance coating. This product is designed to be used full-strength as packaged, DO NOT DILUTE.

## THE BONA PREP® SYSTEM:

Bona Prep® is a three-part system that conditions, deep cleans, and prepares the existing finish to optimize adhesion of the new coat of finish. ALWAYS PREPARE A SAMPLE OR TEST AREA TO DETERMINE COMPATIBILITY, APPEARANCE AND DESIRED RESULTS. For factory prefinished flooring, contact the manufacturer for specific recoat recommendations.

## PREPPING THE SURFACE

1. Vacuum or sweep floor thoroughly to remove loose dirt and grit.
  2. Use Bona Prep as a spray buff solution with a standard speed (175 rpm) buffer and a Bona® Conditioning Pad. Spray Bona Prep over a large section of the floor (approximately 3'x12') at the rate of 2,000 square feet per gallon.
  3. Before spray buffing the next section, remove all residues immediately, using a Bona® Microfiber Mop dampened with Bona Prep.
- NOTE:** Overlap sections to ensure that no areas are missed.
4. When dry, abrade the entire floor using the Bona Multidisc with Bona Diamond 240 grit disc for best results. Alternatively, abrasion can be done using either a Bona conditioning pad driving two or three 240-grit Bond Diamond Abrasive or a second Bona conditioning pad. All these options will ensure abrasion of the edges next to any over wood and in the grain pattern and optimize adhesion of the finish topcoat. Beveled edges and any visibly unabraded areas should be cleaned and abraded by hand.
  5. Thoroughly clean the floor by vacuuming, then using a Bona Power Scrubber (white brushes and Bona Prep®) to remove the fine Diamond abrasion dust; or wet tacking with Bona Prep®, Bona® Microfiber Mop and Bona® Microfiber Wet Cleaning Pad.
  6. Allow the floor to dry completely. Then apply a Bona waterborne or oil-modified finishing system within 2
